

A guide to satellite tweeting via YB Connect for NB 2018

Get Setup (you only have to do these steps ONCE!)

- Step 1** - Download the 'YB Connect' app from the App Store
- Step 2** - Ensure Bluetooth is turned ON on your phone/tablet
- Step 3** - Open the YB Connect app, and choose 'Create an account'. Follow the instructions.
- Step 4** - Once your account is created, choose '*No - this is somebody else's tracker*'
- Step 5** - Choose your YB from the list of devices shown. Your phone will only be able to see trackers in range and activated.
- Step 6** - Once connected, choose 'Enable Messaging'
- Step 7** - Enter your username and password used when you created your account in step 3.
- Step 8** - Go to 'My Account / Link Facebook & Twitter' and link up your existing twitter account with the app.

This should enable messaging, and your setup is complete. Please note that only one phone/tablet should be registered per device. There is no cost if you are only using the app to send tweets.

Each time you want to send a tweet, simply follow these instructions below:

Send a Tweet

- Step 1** - Open the YB Connect app
- Step 2** - Press 'Send Message'
- Step 3** - Tick the 'twitter' icon
- Step 4** - Type your message
- Step 5** - Click *Send* !
