

# Obtaining COVID testing required by Bermuda for travel to Bermuda

The Bermuda Government requires a negative COVID test to obtain a Mariner’s Travel Authorization (for those arriving by boat) or a Travel Authorization (for those traveling by air). As an aid to competitors, the Bermuda Race Organizing Committee (BROC) has worked with two vendors [TestZone Services](#) and [Fit to Fly BDA](#) to tailor their testing capabilities for the race.

To ensure that there will be sufficient testing capability available to test all competitors, return crew, and guests in a short period of time before the race, **both services require** those wishing to use these services to **register** for a testing time slot with the service they choose.

**You are not required to use these services.** They have been arranged by BROC with the vendors for your convenience and to ensure that there is sufficient testing capacity available to meet the needs of all competitors.

## Testing For Competitors

### Option 1: Test in person in Newport

You may choose to test in-person in Newport at the race headquarters at Sail Newport. In-person testing is offered by TestZone Services providing Rapid PCR testing on Monday and Tuesday and Rapid Antigen testing on Wednesday.

[FIND OUT MORE](#)

### Option 2: Test remotely by video

Proctored Antigen testing is permitted by Bermuda 2 days before departure so you may test remotely by video from anywhere in the world on Wednesday 6/15 and have results so the boat captain can register the boat by 1900.

[FIND OUT MORE](#)

### Option 3: Provide your own test results

You do not need to use the testing services arranged by BROC as long as your test results are from a valid source as stipulated by the Bermuda Government and are provided so the boat captain can register by 1900 on Wednesday.

[FIND OUT MORE](#)

### Antigen test kits to take onboard for the race

TestZone also can provide antigen test kits to take onboard for the race. You order them through the service and pick them up at registration in Newport. BROC VERY strongly encourages each boat to have two antigen tests (usually kits come with two tests) on board per crew member for self-testing during the race (and one pulse oximeter on each boat).

# Testing For Return Crew and Guests/others flying to Bermuda

## Test remotely by video

Return Crew members, friends, family, guests, etc. may also use the remote (at home) proctored antigen testing services.

OTC Rapid Antigen Kit for crew to take onboard	NEWPORT				X		\$20/2 tests

\*includes confirmatory rapid PCR test if positive

# Testing remotely by video

Proctored Rapid Antigen testing tailored to the race is offered by two vendors: “TestZone Services” and “Fit to Fly BDA”. Unlike on-site in-person testing, numerous other commercial services are available if you wish to find another vendor. These two vendors have specifically adapted their services to support the needs of the race, particularly to have sufficient capability to test all competitors that choose this testing option on Wednesday. It is essential that anyone intending to utilize these services register in advance.

The two services have some differences in their offerings. The significant differences are:
